Say “*I do*” to love for generations with *Chapel Events & Not Forgotten*®

Your love - secured for generations with the help of Not Forgotten time capsule technology - keeping love stories and memorabilia safe and accessible for up to 300 years. Don't sacrifice your memories to time or digital decay; secure them today. The journey begins with “I do” to generations of love and connection with NotForgotten.

Not Forgotten

Our team of archivists, genealogists, blockchain experts, and audio visual media technologists engineered a range of memory boxes so that generations of a family can enjoy their stories. To complement the technology, a public library and the Digital Preservation Trust work hand in hand to provide the ultimate peace of mind to our customers.

Fill your memory box with hours of video, thousands of photos, or all the digitized memorabilia from your first date to the last dance of the night.
